## **LET US EXPOSE THE TRUTH BEHIND THE US IMPERIALISTS' RIGGING UP OF THE UN TEMPORARY COMMISSION ON KOREA**

Instructions to the Director of the Information  
Department of the People's Committee  
of North Korea  
*November 19, 1947*

Recently the US imperialists have again revealed their insidious aggressive designs against our country. As you know, when they attempted to bring the Korean question to the UN General Assembly, delegates of the Soviet Union and many other countries strongly insisted that Soviet and US troops be withdrawn from Korea simultaneously and the Korean question be entrusted to the Korean people themselves. Nevertheless, the US imperialists illegally turned the Korean issue over to the UN General Assembly in flagrant violation of the Korean people's right to self-determination.

At the Second Session of the UN General Assembly that was to discuss the Korean question, the US imperialists opposed the just demand from delegates of different countries that representatives of the Korean people be allowed to participate in the session. At the session of the UN General Assembly, they railroaded a "resolution" through, by invoking their vetoing machine, on setting up the UN Temporary Commission on Korea and under its supervision, staging "elections" in Korea to establish a "government." This is an intolerable insult to our nation and a shameful challenge to the unanimous desire and demand of the world's peace-loving peoples for Korea's complete independence and sovereignty and its democratic development. This also shows the US imperialists' crafty scheme to cover up their blatant interference in the internal affairs of Korea by means of the UN signboard.

It is most likely that the US imperialists will stage intensive manoeuvres to reduce Korea to their colony, on the pretext of implementing the UN "resolution" on the Korean question.

How mortified our people were to be forced into miserable slavery under the Japanese imperialists' colonial rule for nearly

half a century! And now the US imperialists are attempting to make colonial slaves of our people again! How can we tolerate this?

We must resolutely reject the US imperialist moves to colonize Korea and expose their true colours before the fair world public. This will lay bare in front of the whole world their foul nature as an aggressor.

We must write a powerfully worded statement which clarifies the illegality of the UN Temporary Commission on Korea rigged up by the US imperialists and our Party's principled stand towards it, and broadcast it by radio.

At present, the people are waiting to hear what our Party has to say about the US imperialists' rigging up of the UN Temporary Commission on Korea.

We must be quick to write a statement to expose and denounce how the US imperialists moved to cobble together the UN Temporary Commission on Korea, and broadcast it, so as to deal a blow at the US imperialist sinister scheme to colonize Korea, and strongly mobilize all the Korean people to the struggle to oppose the UN Temporary Commission on Korea.

In writing the statement to be broadcast, the following points should be stressed:

First, it should logically clarify that the US imperialists got the UN to unilaterally discuss and decide on our nation's internal problem without the participation of any representative of the Korean people, and that this is an intolerable insult to our people, as well as a completely illegal act.

The current UN "resolution" on the establishment of the UN Temporary Commission on Korea was forcibly rushed through by the US imperialists, who invoked their vetoing machine. Therefore, we must sternly announce that the Korean people by no means recognize this illegal "resolution."

Next, we must reveal the US imperialists' purpose of trying to introduce into Korea the UN Temporary Commission on Korea, a tool of interference in our country's internal affairs.

Their purpose is, in a nutshell, to justify their aggression and interference against Korea internationally under the UN signboard and further, to make our country their permanent colony.

Moreover, we must make clear the fighting task confronting the south Korean people.

The major fighting task for them is to unite closely under the banner of national independence, oppose the entry into south Korea of the UN Temporary Commission on Korea and launch a nationwide struggle together with the north Korean people to establish an independent and democratic, unified government as soon as possible.

You must write the statement tonight, and broadcast it by radio tomorrow. Ensuring promptness in broadcasting is a highly important matter that decides victory in the battle against the enemy. In order to take the initiative firmly in broadcasting warfare, it is imperative to seize the right time and occasion. Therefore, you must not have this statement written by somebody else; you, the director of the Information Department, must write it personally. Writing is no easy job, but all our officials should be able to write articles. Writing is, in a manner of speaking, an important weapon of struggle for revolutionaries.

When you have finished the statement, I will go over it.

After its completion, you yourself must appear and broadcast it in a powerful and strongly appealing tone. A newsreader might take on the job, but your presence will be official and have a greater effect.

From now on, we should launch a more powerful broadcasting campaign. So all broadcasting workers should be

encouraged to work efficiently with a high degree of political consciousness.

Radio is the most powerful of all the means of information and motivational work at the disposal of our Party. You should always pay close concern to broadcasting and make sure that all broadcasting workers perform their duties to the utmost of their abilities.
