Great Sun Illuminating New Era of Independence

President Kim Il Sung on Mt Paektu, a sacred mountain of revolution, in August Juche 78 (1989)

The height of a great man is just that of his immortal exploits, and his immortality is just the rays of his ever-lasting exploits cherished deep in the mind of mankind.

President Kim Il Sung gave the torch of Juche to the mankind who were in agony and wandering as they did not know where they could find out the strength to carve out their destiny.

Having perfectly understood the essence and requirement of the times, he created the Juche idea which proved that the strength with which to remodel the world and transform the destiny of man lies in the masses themselves. This is an exploit of exploits to be worthy of recording in the history of ideology of mankind and the history of the world's great persons.

A foreign philosopher, who ardently held that mankind should set up a tower of the Sun of Kim Il Sung on the highest and central position of the earth, said:

“Were it not for President Kim Il Sung, history must have taken a wrong track. Gigantic changes that cannot be compared to the combination of all myths and miracles like the Promethean fire and the Seven Wonders of the World were made by the President.”

Thanks to the great Juche idea, the masses, who had long been forced out of history, are opening up a man-centred new era and new world, standing at the centre of the times as immortal beings with great strength to transform the world and turn the wheels of history.

President Kim Il Sung, who clarified the new era of independence by creating the immortal Juche idea, is the Sun of the century and saviour of all the people. He lives for ever in the hearts of mankind.

Peerless Patriot, Hero of the Century

Songs of yearning sung by the people resound on this land, where the beaming image of Chairman Kim Jong Il, a peerlessly great man, is shining.

Chairman Kim Jong Il was an outstanding genius of ideology and theory, prominent veteran statesman admired by the world, great builder of a Juche-oriented revolutionary Party, peerless patriot who upheld the banner of building a prosperous country, matchless iron-willed commander, great defender of the socialist cause and benevolent father of the people.

The gigantic changes and ever-lasting exploits and heritage he achieved in the course of leading the revolution are shining more intensely as the days go by for their uniqueness and truthfulness.

His revolutionary career was the greatest in terms of love for the country and people, and the influence on promoting the development of the times and the revolution.

So, all the Korean people and world progressive peoples pay deep respect to him, who devoted his whole life to the prosperity of his country, the happiness of his people, the completion of the revolutionary cause of Juche and the cause of global independence.

His august name and sacred revolutionary career, as an immortal strength and flames of victory, are encouraging the dynamic march of the Korean people.

The beaming smile of Chairman Kim Jong Il will be immortal, and the road ahead of Juche Korea is rosy.

President Kim Il Sung and General Kim Jong Il are not only the leaders of the DPRK but also leaders of the world people who are aspiring to global peace and independence.

Cristian Pibeta, head of the Italian Group for the Study of the Juche Idea

Through my current visit, I came to have a better understanding of the exploits of President Kim Il Sung and General Kim Jong Il. They were great revolutionaries recognized by the world.

From the capital city of Pyongyang to the villages in remote mountains and far-flung islands, all students including new primary schoolchildren and college freshmen have put on their new school uniforms.

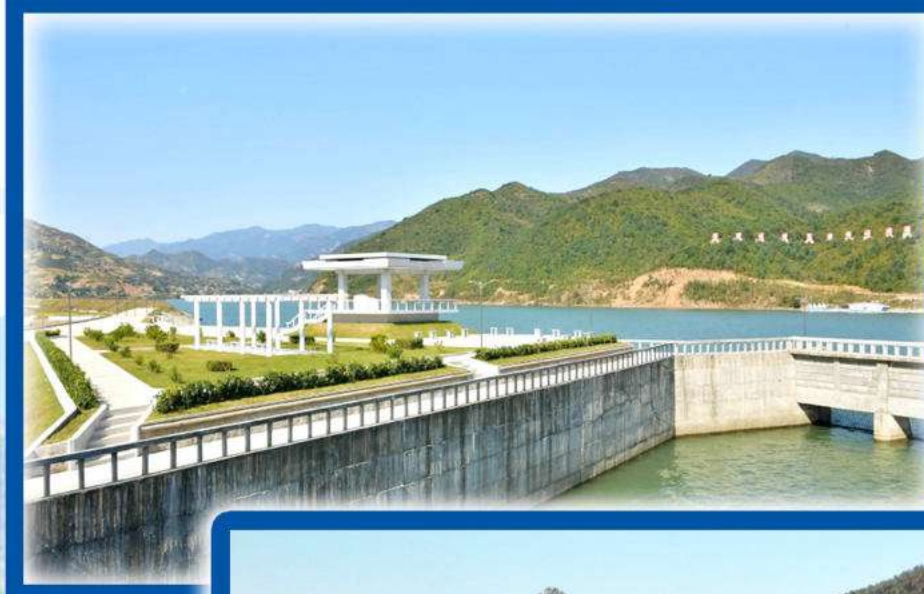

The Fourth Plenary Meeting of the Eighth Central Committee of the Workers' Party of Korea set forth a task of supplying all the students in the country with quality uniforms and bags of new forms without exception, and took an important measure to implement it though the country is undergoing difficulties.

Such fact can be seen only in the DPRK which regards the work of training younger generations as its pleasure, not trouble, and values the bright smile of new generations more than any amount of treasure.

The spread of COVID-19 in the DPRK had been contained in a short span of time thanks to the important measures of the Workers' Party of Korea and the state which regard the people as heaven and take their interests as their first foremost basis and absolute standard.

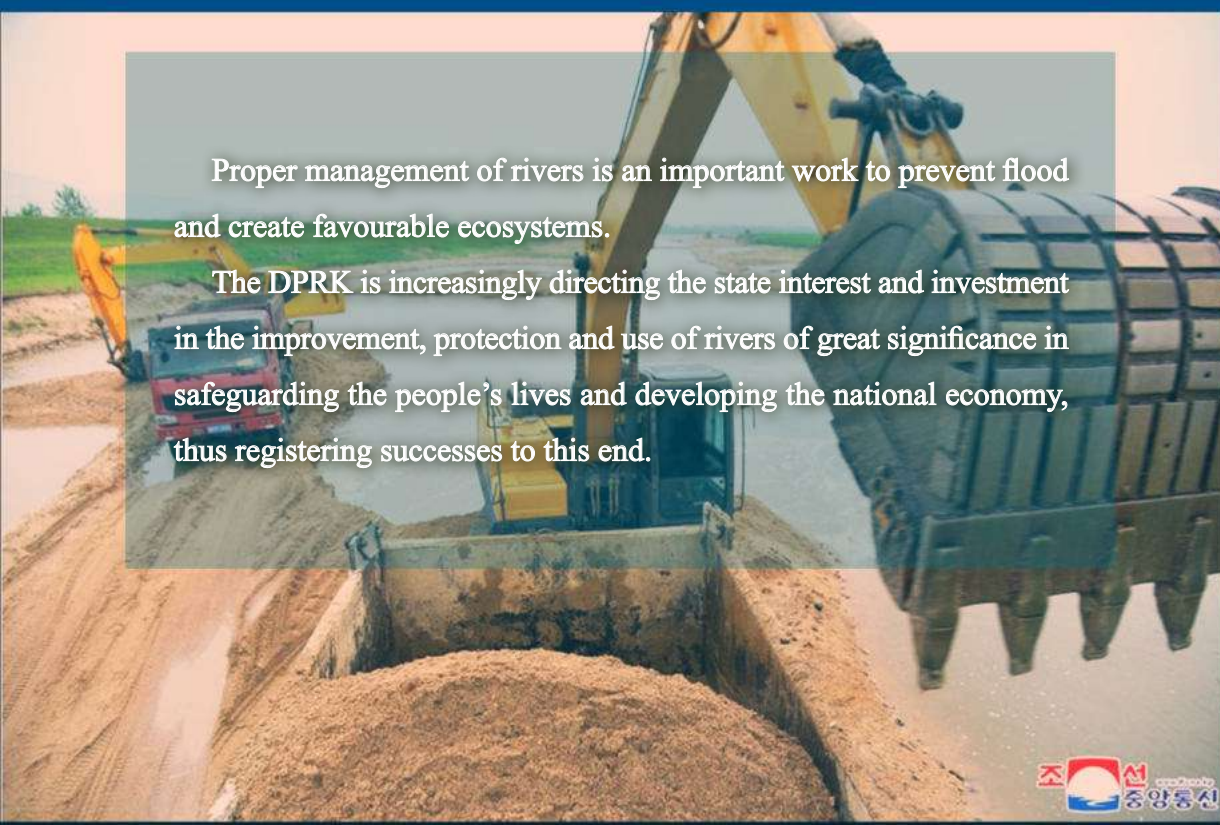

Experiencing the current health crisis, the Korean people regarded the medical workers as the defender of the best system in the world and reliable protector of their lives. The state is accelerating the work of perfecting its anti-epidemic system and order, sufficiently providing epidemic prevention forces and material and technical means and giving a higher level of medical service to the people.

Proper management of rivers is an important work to prevent flood and create favourable ecosystems.

The DPRK is increasingly directing the state interest and investment in the improvement, protection and use of rivers of great significance in safeguarding the people's lives and developing the national economy, thus registering successes to this end.

National Flag of the Democratic People's Republic of Korea

The national flag of the Republic is fluttering high over the blue sky.

The flag, which is associated with the blood of the forerunners, reflects the pure nationality and promises the bright future of the country, is just the motherland and socialism for the Korean people as well as their own self.

It will flutter more fiercely along with the ever-prospering DPRK.
