

Kim Il Sung-Kim Jong Il Foundation

Pyongyang, DPRK
Juche 112 (2023)

The DPRK put forward housing construction as a primary task to carry out in all its major policies and dynamically propelled to implement it, thereby ensuring and protecting the people's happiness and their bright future. It is a praiseworthy reality that can be seen only in our socialist system where people are regarded as Heaven.

Another ideal street for people was built in Pyongyang, the capital, demonstrating a radical development of Juche Korea to the whole world and other substantial changes announcing a new era of rural rejuvenation were also made in every part of the country.

The respected Comrade **Kim Jong Un** participated in the inaugural ceremony of 10 000 flats in the Hwasong area and hoped that the working people who removed to their new houses delightedly in a hearty welcome of all people in the country would lead the happy, harmonious and worthwhile lives throughout generations.

A change made in the Hwasong area in no more than a year verifies that the Workers' Party of Korea fulfills by all means the promise it made with the people and the heroic spirit and irresistible force of the Korean people firmly united as one mind and purpose around the Party Central create enormous substantial changes.

People are so much excited over being free distributed and settling in their modern houses.
